Discover. Decide. Act.®

www.archaedismend.io

What we do:

Full-Scope Security and Mission Effectiveness Assessments › Strategic Planning and Risk-Based Prioritization › Security Design, Implementation, and Training

How we do it:

Inspect · Interact · Measure

DISCOVER

What is valuable to a threat actor?
Where do detection gaps exist?
How are you vulnerable?

We discover issues across physical, cyber, and human factors domains, enabling comprehensive insight into your security effectiveness.

Analyze · Prioritize · Strategize

DECIDE

Diagnose core issues, not symptoms.
Focus on your priorities.
Don't merely trust obscure algorithms.

Security organizations must decide what to monitor, what to detect, and how to respond. Our framework emphasizes prioritization, tracing your decisions from cause to effect.

Deter · Detect · Respond

ACT

Resolve or mitigate vulnerabilities.
Improve detections.
Optimize security operations.

Security assessments should lead to action, not paralysis. We work with your team to identify and tackle your highest impact options.

Facilities · People · Technology

We tackle the entire interconnected security domain.
Physical + Human + Cyber

Who we are:

EDUCATION

Degrees or certifications in Computer Science; Nuclear, Electrical, and Computer Engineering; Psychology; Law; and International Security.

EXPERIENCE

Specialized training and experience in Data Analysis, Cyber and Physical security, Open Source Intelligence, Machine Learning, Intelligence Analysis, Penetration Testing, Incident Handling…

PAST AFFILIATIONS

Diverse security experience leading efforts both domestically and internationally across the DIA, FBI, NSA, U.S. Navy, and the private sector.
